

Publication Development

Within3's modern virtual engagement platform works across the entire enterprise for all types of internal and external engagements. Accessible 24/7 from any connected device, Within3 offers advanced features for unmatched flexibility, security, and compliance on the back end and simplicity on the front end—even for first-time users. New to virtual engagement? Within3 experts support your internal team from kick-off to conclusion and beyond.

- ✔ Single place for authors to contribute, engage, and edit manuscripts on any device
- ✔ Make comments and suggest edits in real-time
- ✔ Teams that use Within3 report that the platform significantly reduces their timelines
- ✔ Regular updates keep medical writers and expanded publication team members informed on workflow status

Within3: Significantly reduce timelines

- ✔ Expertise provided by Client Success on session set-up and design
- ✔ Utilize proven Within3 templates to connect each aspect of overall publication plan in one place
- ✔ Optimize contributions with technical training and coaching provided by Within3 for both authors and medical writers

Benefits of using Within3 for Publication Development:

Connects multiple phases of manuscript development in one room for all authors

Streamlines communication to participating authors

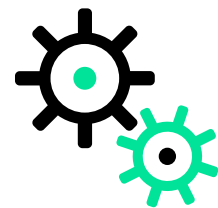

Provides version control

Eliminates multiple email exchanges

Keeps proprietary information and IP secure

Effectively integrates with medical affairs and regulatory committees
